

## Bugs and feature requests

- Feature: Add a “clear” button to reset the calculator
- Feature: Add more operators
- Bug: Doesn't have exception handling for number larger/smaller than “double” (64bit)
- Bug: All numbers are displayed as decimal values after calculation, even when not necessary
- Feature: Add unit testing
- Feature: Use BigDecimal instead of double for calculation as floating point numbers aren't necessarily exact.
- Refactor: Let Calculator class have a field to store the current number to separate GUI and calculation logic further.
